

Отримати ключі Google API

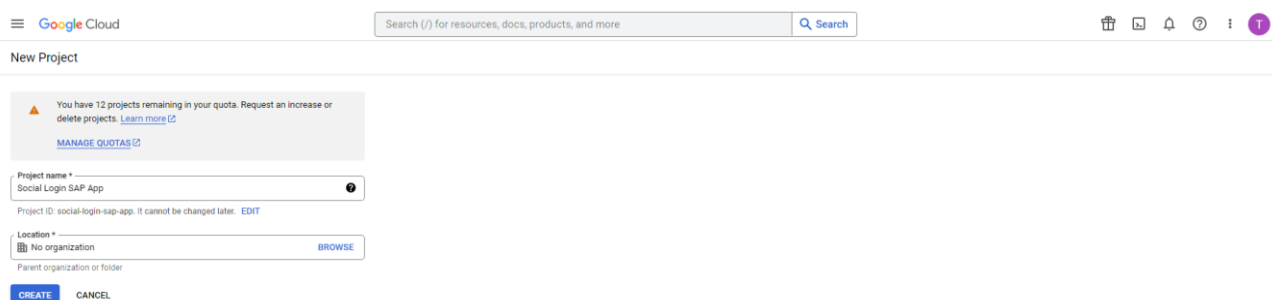

Крок 1: Відкрийте сторінку [Google](https://www.google.com) і увійдіть у свій аккаунт Google. Потім перейдіть до сторінки **Google console**: <https://console.developers.google.com>

Крок 2:

- Натисніть посилання «**Select a project**» у заголовку, щоб відкрити спливаюче вікно «**Select a project**». Натисніть «**New project**».

- Введіть назву проекту > виберіть головну організацію або папку (необов'язково). Натисніть кнопку «**Create**»

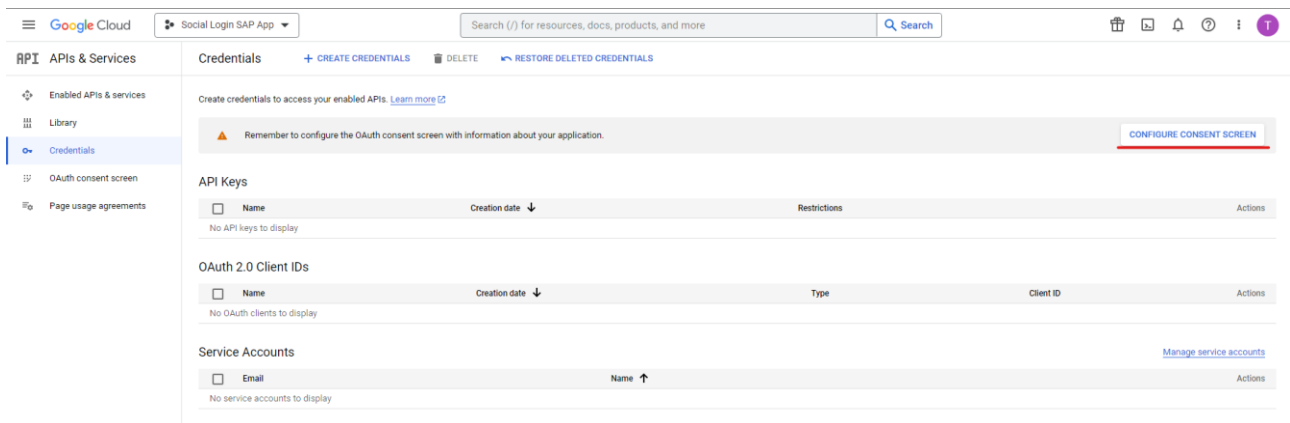

- З'явиться сповіщення. Натисніть «**Select project**», щоб відкрити щойно створений проект

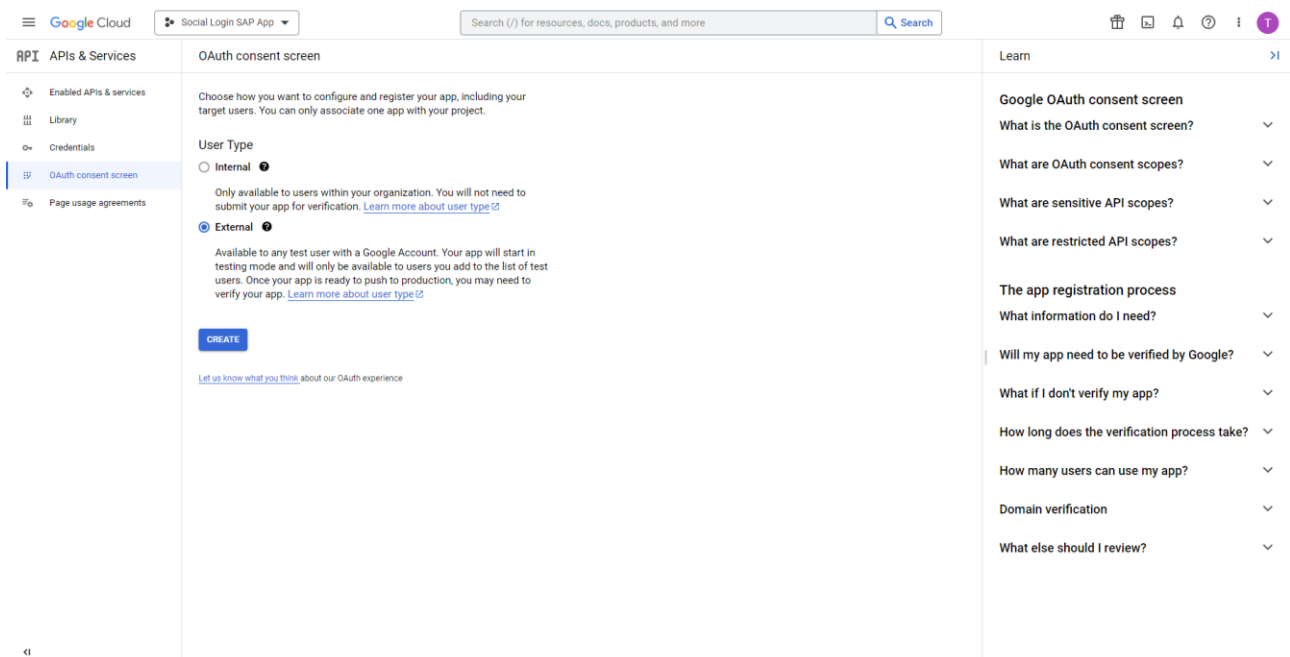

Крок 3:

- Відкрийте меню сторінки проекту. Виберіть «**APIs & Services**» > «**Credentials**».

- Натисніть кнопку «**Configure consent screen**».

- Виберіть опцію «**External**», а потім натисніть «**Create**».

- Введіть необхідну інформацію на сторінці «**OAuth consent screen**»:
 - App name: введіть назву програми.
 - User support email: виберіть адресу електронної пошти.
 - App logo: завантажте зображення, щоб зробити його логотипом програми.
 - App domain: введіть URL-адресу свого веб-сайту в поле «**Application home page**».

App information

This shows in the consent screen, and helps end users know who you are and contact you.

App name *
Social Login SAP App

The name of the app asking for consent.

User support email *
example@gmail.com

For users to contact you with questions about their consent

App logo

This is your logo. It helps people recognize your app and is displayed on the OAuth consent screen.

After you upload a logo, you will need to submit your app for verification unless the app is configured for internal use only or has a publishing status of "Testing". [Learn more](#)

SAP

App logo preview

Logo file to upload
SAP.jpg

Upload an image, not larger than 1MB on the consent screen that will help users recognize your app. Allowed image formats are JPG, PNG, and BMP. Logos should be square and 120px by 120px for the best results.

App domain

To protect you and your users, Google only allows apps using OAuth to use Authorized Domains. The following information will be shown to your users on the consent screen.

Application home page
https://sapas.pw/

Provide users a link to your home page

Application privacy policy link
https://sapas.pw/privacy

Provide users a link to your public privacy policy

Application terms of service link
https://sapas.pw/terms

Provide users a link to your public terms of service

Authorized domains

When a domain is used on the consent screen or in an OAuth client's configuration, it must be pre-registered here. If your app needs to go through verification, please go to the [Google Search Console](#) to check if your domains are authorized. [Learn more](#) about the authorized domain limit.

Missing domain: sapas.pw

+ ADD DOMAIN

Developer contact information

Email addresses *

These email addresses are for Google to notify you about any changes to your project.

How is this info presented to users?

This is the consent screen that users see

1. The logo and name of your app
A logo is recommended, but it is not required

2. The email address that users can use to contact you and a list of scopes

Введіть свій домен і натисніть кнопку «**Save and continue**», щоб завершити. Ви можете додати кілька доменів для додатку.

Крок 4:

- Натисніть кнопку «Add or remove scopes».

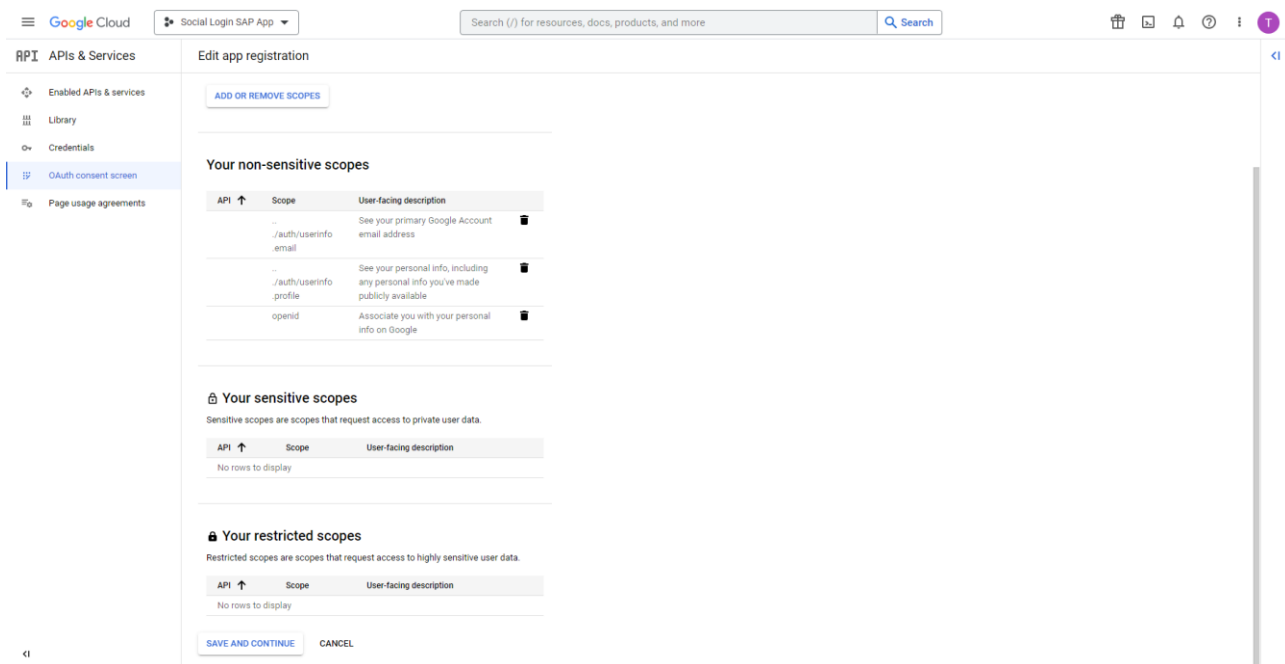

- Виберіть такі області:
 - .../auth/userinfo.email
 - .../auth/userinfo.profile
 - openid

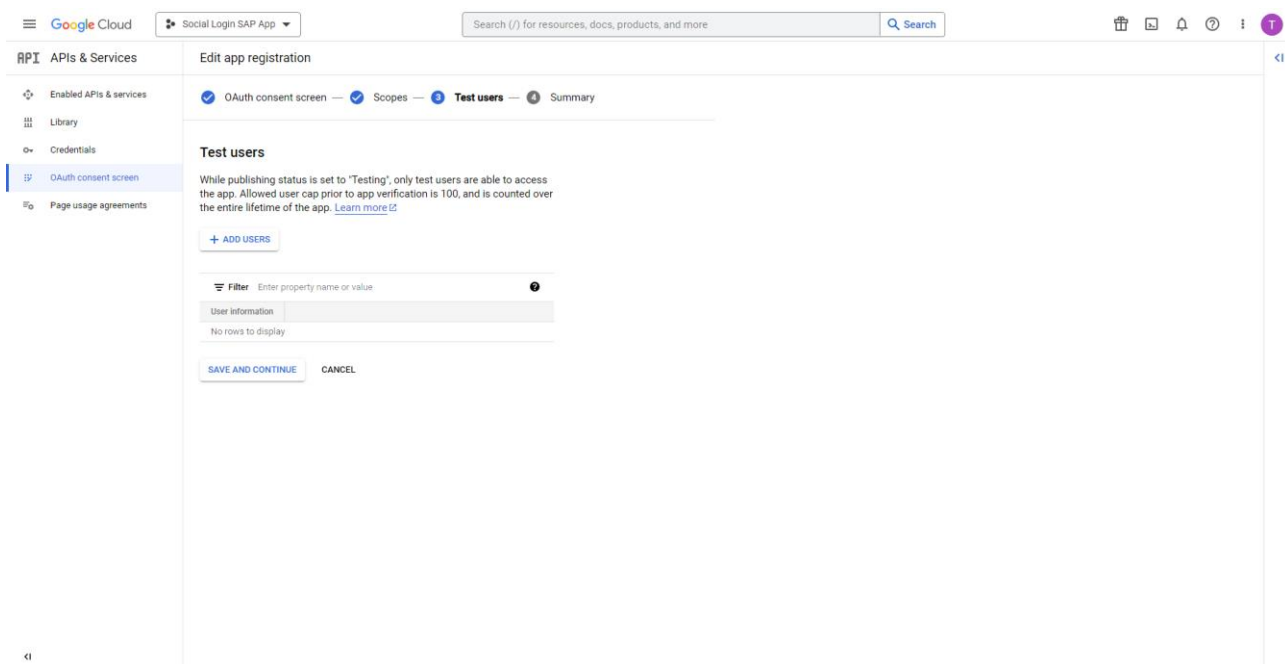

Потім прокрутіть вниз і натисніть кнопку «Update».

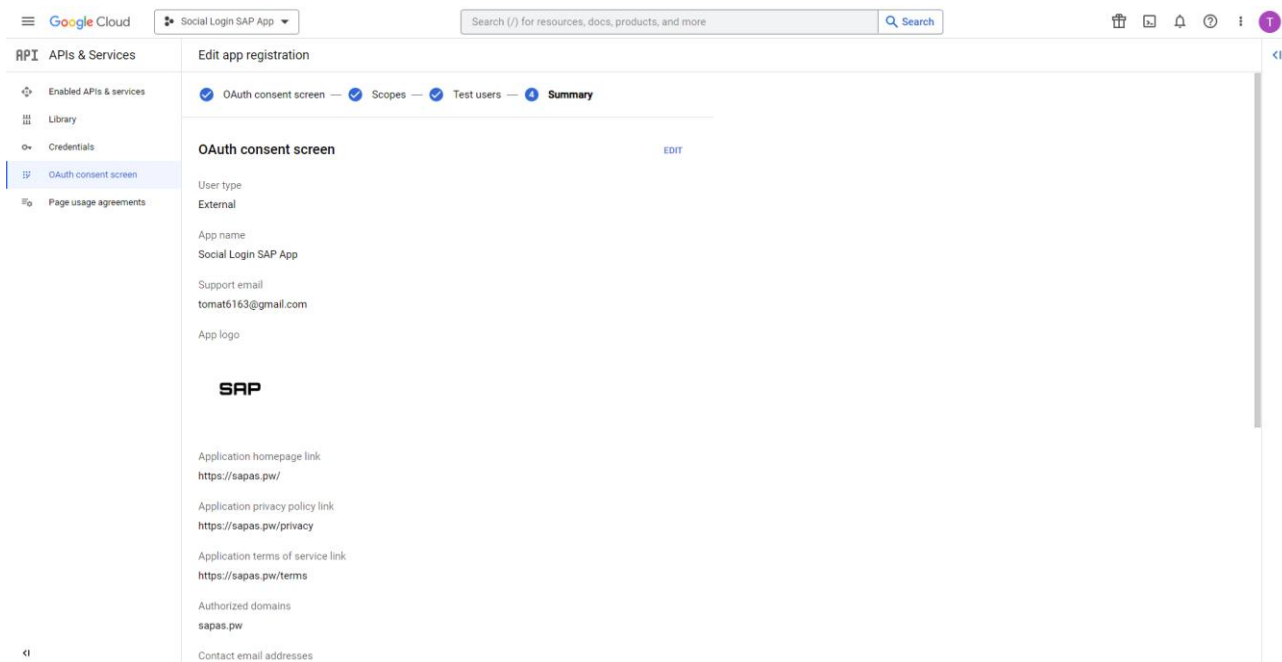

- Натисніть кнопку «Save and continue».

- Ще раз натисніть кнопку «**Save and continue**».

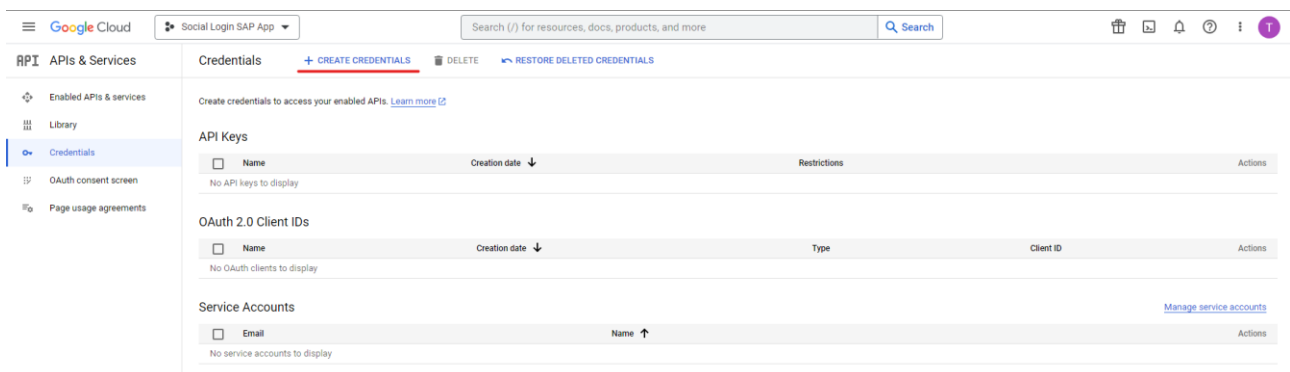

- Перегляньте всю інформацію. Якщо ви хочете змінити будь-яку інформацію, натисніть посилання «**Edit**».

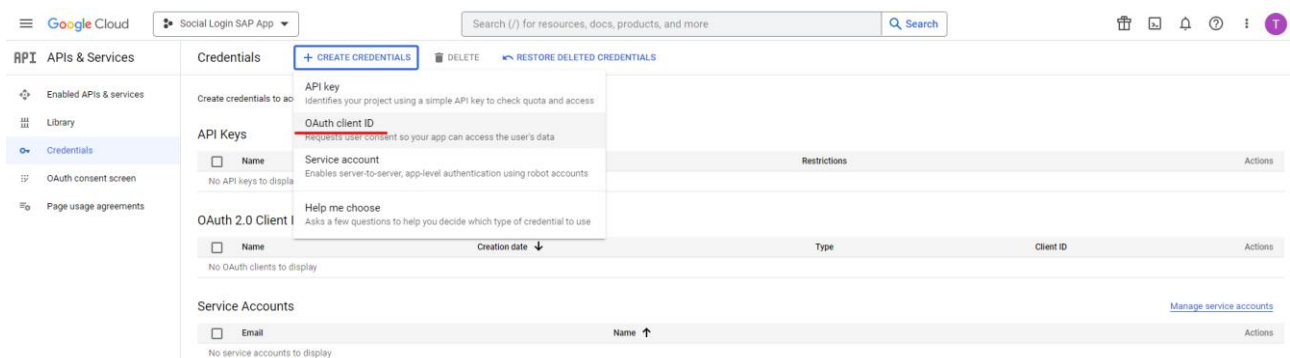

Крок 5:

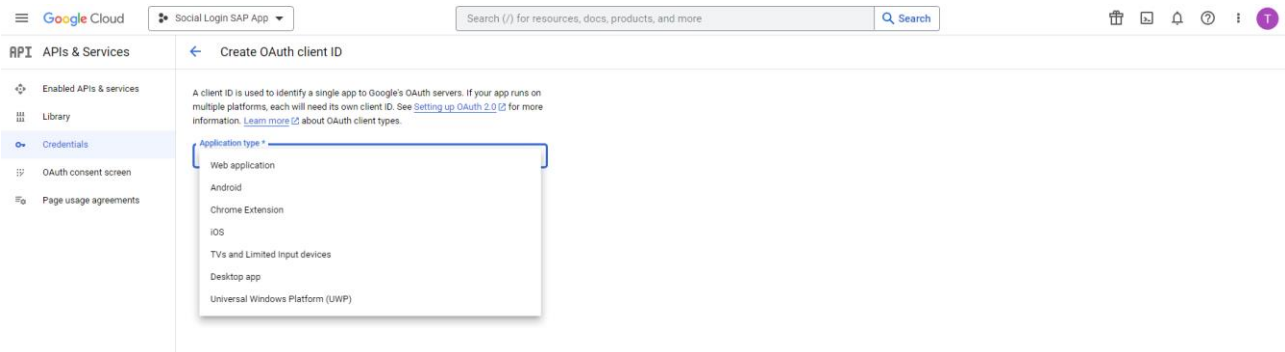

- Перейдіть на сторінку «**Credentials**». Натисніть кнопку «**Create credentials**».

- Виберіть параметр «**OAuth client ID**».

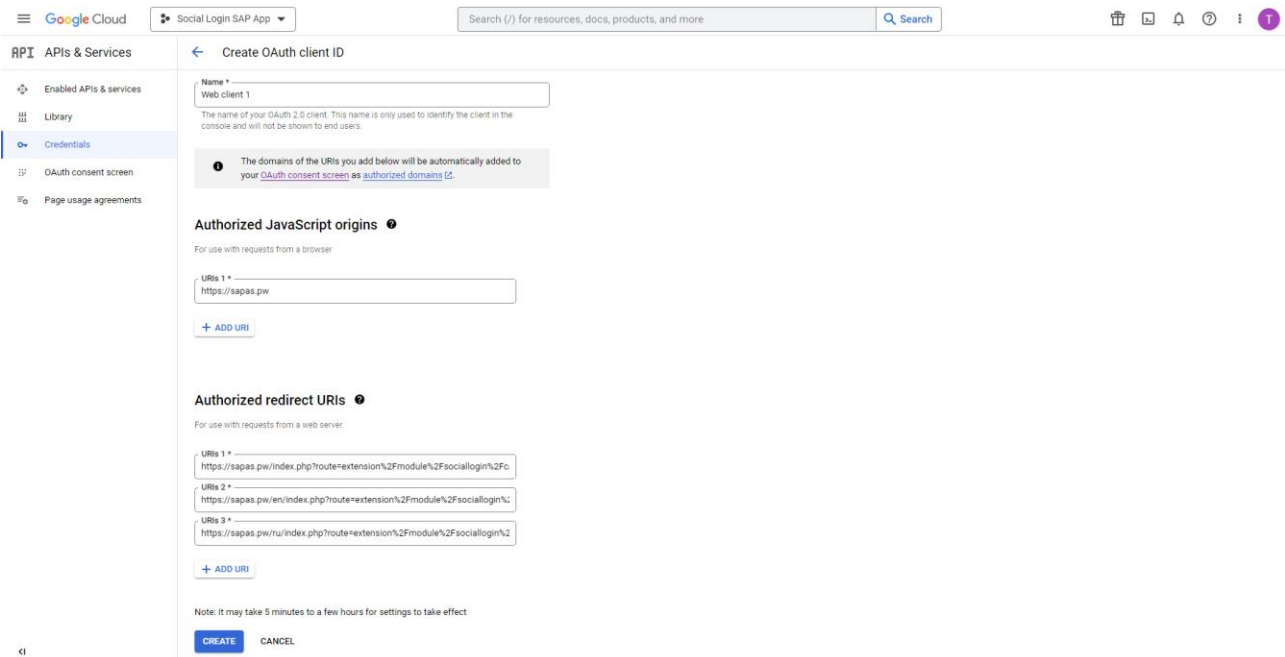

- Виберіть «**Web application**» для поля «**Application type**».

- Нам потрібно буде ввести «**Authorized JavaScript origins**» і «**Authorized redirect URIs**».

Натисніть кнопку «**Add URI**» і:

- Введіть URL-адресу свого веб-сайту для «**Authorized JavaScript origins**»
- Введіть URI перенаправлення, наданий модулем **SAP - Login Social Networks** для «**Authorized redirect URIs**». Ви можете ввести кілька URI перенаправлення, якщо ваш веб-сайт має кілька мов.

Push to production?

Your app will be available to any user with a Google Account.

You've configured your app in a way that requires [verification](#). To complete verification, you will need to provide:

1. An official link to your app's Privacy Policy
2. A YouTube video showing how you plan to use the Google user data you get from scopes
3. A written explanation telling Google why you need access to sensitive and/or restricted user data
4. All your domains verified in Google Search Console

[CANCEL](#) [CONFIRM](#)

- Натисніть кнопку «**Prepare for verification**».

OAuth user cap

The user cap limits the number of users that can grant permission to your app when requesting unapproved sensitive or restricted scopes. The user cap applies over the entire lifetime of the project, and it cannot be reset or changed. Verified apps will still display the user cap on this page, but the user cap does not apply if you are requesting only approved sensitive or restricted scopes. If your users are seeing the "unverified app" screen, it is because your OAuth request includes additional scopes that haven't been approved.
